

# RightCrowd SmartAccess Visitor Management Secure, Compliant, and Hassle-Free Visitor Management—Built for Modern Organizations.

**Transform lobby operations, ensure safety, security, and compliance, and offer visitors of all types a warm welcome.**

RightCrowd SmartAccess Visitor Management is an enterprise solution designed to handle the unique security, security and compliance requirements of large organizations. Built to manage busy lobbies and high traffic, complex approval workflows, and global compliance, our solution lets you transform lobby operations and offer guests a warm welcome.

## Manage every type of visitor

Whether you're handling scheduled or walk-in guests, clients, job applicants, VIPs, or large groups, create check-in processes for every type of visitor that match your business, identification, and compliance needs.

## Enable self-service and streamline lobby operations

More visitors doesn't mean more staff. Intuitive visitor self-service options, QR codes, kiosk applications, and automated preregistration capabilities eliminate the inefficiencies of a guest register and provide a seamless experience.

## Keep your PACS in sync with your business & IT systems

Seamlessly integrate your PACS with key business systems to maintain real-time identity synchronization and enforce access controls, ensuring that only authorized visitors have physical access exactly when and where they need it.

## Be a great host, no matter how big the group

Large, diverse groups can be pre-registered and inducted in advance of their visit or they can be processed in bulk by hosts and checked in by group coordinators.

## Go into your next audit with confidence

Keep full audit trails in real time of all identity, credential, and access levels granted including why access levels were approved and by whom, especially for sensitive areas. You'll be prepared for an audit anytime.

*Did you know you could  
save  
**\$100K+**  
every year  
by replacing a 3-minute  
manual check-in with an  
enterprise visitor  
management system?*

### **Ensure visitors are authorized to be on-site**

Automate site inductions, training requirements and physical access approvals to ensure that every visitor or contractor is safe and authorized to be there.

### **Personalized visitor access**

Reduce administrative burden by allowing your visitors to self-register and badge themselves in.

RightCrowd Visitor Management supports a range of self-service kiosks and peripheral devices, geared to match your unique business and identification requirements.

### **Manage visitor badges and sign-in**

Enhance your physical access control system to provision visitor cards with only the physical access they need.

RightCrowd Visitor Management provides real-time and historical data for people on-site, both past and present.

### **Visitor self-service and smart pre-registration**

Enhance your physical access control system (PACS) by ensuring compliant on-boarding, off-boarding and cardholder access requests.

Remove the guesswork around visitor status and location with a dashboard view of visitors due to arrive, that are on-site and overdue to exit.

### **All your systems working seamlessly together**

Integrate information from multiple PACS, HR, identity, and other directory systems, background checks, learning management, ERP, and more to create a single cardholder profile for all your personnel including employees, visitors, contractors, and students.

Connect your systems and automate your processes so you can make good access decisions, improve safety and security, and strengthen compliance in your organization.
